Dear Je, reur helpful 11/19 and GL's lurch and collar-tugging: these I did not notice. Hoever, I have noticed a nose swiping with a finger(fore, I think) everal times. Not from drip, apparently. I also noticed this in Ehrlichman before Ervin committee. The comment of the woman about heavy tranquilizers seems reasonable.
Caen 11/19 Memo to Col Hughes: I amiled you a poor copy of the original. It has been going around Washington, was on a Posy bulleting board. I got it from one who has seens Haldeman's "H" often enough to say this is his, no foolin'.
WSJ on "feisty" GL sounds more like uppers than tranquilizers.
Which reminds: so does sleeplessness.
So, the evidence accumulates that you, too, are hooked to the tube. Well, it does give a little more. If you saw him on the newscasts talking to his "advisers" about the energy crisis, perhaps you saw how amateurishly it was staged and how juvenile his remakrs were. The lights even reflected from the windows behinf him.
I have inside poop that George Schultz is trying to get out, has been, and can't. HW11/16/73
